Suphanat Chanlek

suphanatchanlek@gmail.com | (+66) 61-260-1997 | Bangkok, Thailand | https://github.com/suphanatchanlek30 | www.linkedin.com/in/suphanat-chanlek | https://portfolio-suphanat-chanlek.vercel.app

PROFESSIONAL SUMMARY

Third-year Computer Science student with internship experience in backend, frontend, full-stack development, and AI/MLOps engineering. Familiar with application development, API design, database integration, Docker, Git workflows, and deployment practices. Strongly interested in DevOps and Cloud Engineering, particularly CI/CD, infrastructure automation, containerization, monitoring, and reliable system operations. Seeking a DevOps / Cloud Engineering Internship to apply my development background and contribute to scalable, maintainable, and production-ready systems.

EDUCATION

Thammasat University **Rangsit Campus, Thailand**

Bachelor of Science in Computer Science, 3.45 GPA 2024 - Present

- **Relevant Coursework:** Cloud Computing, Linux Administration and Performance Monitoring, Big Data Engineering, Cloud-Based Software Architecting, DevOps Pipelines and Processes, Microservices and Serverless Architectures

TECHNICAL SKILLS

- **DevOps & Cloud:** Docker, Kubernetes, Docker Compose, Git, GitHub Actions, CI/CD Pipelines, Jenkins, Linux, Bash, Nginx, Terraform, Ansible, Helm, AWS, GCP, Azure, Monitoring & Logging, Prometheus, Grafana
- **Backend:** Go, Java, Spring Boot, Node.js, Express.js, FastAPI, PostgreSQL, MySQL, MongoDB, MSSQL Server
- **Frontend:** JavaScript, TypeScript, React.js, Next.js, Vue.js, Angular, Tailwind CSS, Bootstrap
- **ML/AI:** Python, NumPy, Pandas, Open CV, Scikit-learn, XGBoost, TensorFlow, PyTorch, Matplotlib, Seaborn,
- **Tools & Technologies:** Git, GitHub, Postman, Figma, Firebase, Prisma, Label Studio

WORK EXPERIENCE

CONNECTED TECH CO., LTD. **Bangkok**

AI / MLOps Engineer (Internship) July 2026 – Sept 2026

- Supporting AI engineering and MLOps workflows for real-world machine learning projects.
- Assisting in data processing, model development, inference pipeline design, and ML service integration.
- Working on model serving, API-based inference, deployment workflows, and experiment tracking
- Collaborating with engineering teams to build reliable AI systems for production-oriented applications.

T.C.C. Technology CO., LTD. **Bangkok**

Application Developer (Internship & Part-Time) June 2026 – Present

- Contributing to backend development for enterprise application systems.
- Implementing APIs, business logic, and service integrations based on existing system architecture.
- Working with Git, Docker-based environments, databases, and API testing workflows
- Collaborating with the engineering team to debug, maintain, and improve backend services following coding standards.

Thammasat University – Lab Tonkit **Rangsit Campus**

Undergraduate Researcher (AI & Software Engineering) May 2025 – Present

- Contributed to the PADIN Project, a joint AI research collaboration between Osaka University and Thammasat University.
- Developed AI-powered dental X-ray diagnostic tools using SAM 2 and image processing techniques.
- Built an ML backend integrated with Label Studio to support dental image annotation and federated learning research.
- Enabled researchers to process approximately 2,000 dental X-ray images per month.
- Developed and maintained the PADIN project website for research data and annotation tool access
- Deployed a web application on Render to combine individual tooth labels into composite dental images.

ASCEND CO., LTD. **Bangkok**

Frontend Developer (Internship) August 2025 – November 2025

- Developed and deployed responsive web interfaces using Next.js and Tailwind CSS for production systems.
- Integrated frontend components with various backend services, ensuring seamless real-world application deployments.
- Collaborated closely with design teams to translate Figma mockups into high-fidelity, production-ready code.

TRAINING & PROFESSIONAL DEVELOPMENT

Super AI Engineer Season 6 Mar 2026 – Present

Artificial Intelligence Association of Thailand (AIAT)

- Selected as one of 150 participants from over 10,457 candidates nationwide, representing the top 1.5%.
- Completed Level 1: AI Fundamentals, covering ML, Computer Vision, NLP, LLMs, and RAG.
- Passed theoretical assessments and practical training stages in Data, AI Model Development, and LLM/RAG.
- Participated in Kaggle Mini-Hackathons, passing baseline criteria across multiple AI tasks.
- Completed Level 2: Intensive AI Camp, working on real-world industry problems and advanced AI development.
- Currently in Level 3: AI Internship, gaining hands-on experience in real-world AI projects.

PROJECTS

Federated Annotation and Learning Platform | Go (Fiber), PostgreSQL, GORM, FastAPI, AWS

- Contributed to the PADIN Project, a joint research with Osaka University, developing AI tools for dental X-ray analysis.
- Built an ML backend using SAM 2 integrated with Label Studio to support image annotation and federated learning workflows.
- Developed a web dashboard to manage annotation data from Label Studio, store it in a database, and visualize model results
- Developed and deployed web applications and the PADIN project website to aggregate tooth labels from X-ray images and improve accessibility for dental professionals and researchers.

SOS Backoffice | Next.js, Nest.js, TypeScript, Tailwind CSS, PostgreSQL

- Built the entire backoffice frontend in Next.js/TypeScript, integrating from a backend for end-to-end management across the project.
- Collaborated with UI/UX to translate Figma designs into responsive, accessible views using Tailwind CSS and reusable components.
- Implemented core flows (data tables, forms, filters, pagination) with robust state and error handling for production use.
- Collaborated with backend to define/adjust API contracts, delivered features from real requirements, and fixed issues to improve reliability and usability in a live environment.

Coffee Chain Demand Forecasting & Inventory Optimization | CatBoost, Chronos-Bolt, Time-Series Forecasting

- Developed a demand forecasting system for a multi-branch coffee chain to predict product-level sales and support inventory planning.
- Engineered 100+ features from transaction, inventory, promotion, local event, store profile, calendar, weather, and sales behavior data.
- Designed a business dashboard concept for AI-recommended orders, promotion recommendations, and business impact analysis.
- Proposed data-driven business actions to reduce waste, prevent stockouts, improve ordering decisions, and optimize stock planning.

HONORS & AWARDS

Hackathon:

The Winner, Sci Soft Power Innovation Hackathon (SSPI 2024)

- **IN SCENE**, a travel recommendation platform connecting Thai film locations with real-world destinations.
- Delivered an end-to-end prototype through cross-functional collaboration.

The Winner, Coffee Chain Hackathon 2026 - Demand Forecasting at Scale (Super AI Engineer Season 6 x ExpresSo NB)

- Built a **hybrid demand forecasting system** using CatBoost and Chronos-Bolt for inventory planning.
- Proposed **AI-driven inventory optimization** to reduce waste, prevent stockouts, and improve ordering decisions.

1st Runner-up, Sony Smart Factory Hackathon 2025 (SONY DEVICE TECHNOLOGY THAILAND)

- Built an **AI-powered supply chain and production planning platform** for factory operations.
- Developed **smart procurement, anomaly detection, and risk analysis** to support production planning.

1st Runner-up, Digital Innovation Workshop & Hackathon 2023 (TCS x CIS KMUTNB)

- Built **Growth Work**, a job matching platform connecting job seekers and employers.
- Designed an **SDG-aligned digital recruitment solution** to improve employment accessibility.

2st Runner-up, Edge-AI for Intelligence Transport System Hackathon 2026 (Super AI Engineer Season 6 x NT)

- Built a **real-time Edge AI pipeline** for multi-camera vehicle detection and classification.
- Reduced vehicle search time **from 1 hour to < 1 minute**, saving an estimated **฿451K/year**

Rookie Star, Axtra Mile Hackathon 2025 (CP AXTRA)

- Developed **AmaMove**, an end-to-end mobility platform for underserved communities
- Designed an **AI-driven solution** for personalized services and customer insights

Selected Participant (Top 20 out of 273 applicants), Young Webmaster Camp 20 – Web Programming Track

Selected Participant (Top 150 out of 10,457 participants), Super AI Engineer Season 6 – Level 2 Onsite Program
